

Atlas Mountain Construction

Capability Statement

Who We Are

Atlas Mountain Construction is a Tri-State commercial contractor serving as both a general contractor and a specialty subcontractor. We self-perform the core trades under our own crews, eliminating layered subcontractor markups and giving owners a single accountable team from demolition through finish.

How We Deliver

General Contracting

Full-scope commercial construction under a single, accountable contract — tenant improvements, renovations, build-outs, and ground-up new construction.

Construction Management

End-to-end project leadership from preconstruction and budgeting through scheduling, permitting, subcontractor coordination, quality control, safety, and closeout.

Self-Performed Specialty Trades

In-house crews for the core trades — direct control over quality, pace, and budget with no layered markups between you and the work.

Self-Performed Trades

- Demolition
- Rough Carpentry
- Drywall & Framing
- Doors & Hardware
- Painting & Finishes
- Concrete & Masonry
- Finish Carpentry
- Acoustical Ceilings
- Structural Steel
